

G.O. PACK™

Installation procedure:

STANDARD FULL-STOCKED AR-15A2/M-16A2- STYLE RIFLES W. GILES TACTICAL SLING™

*ALSO FITS STONER, ARMALITE, ETC.

WARNING: Mishandling of firearms may cause serious injury or death. Before practicing with your Giles Sling™ make sure your weapon is unloaded and pointed in a safe direction. Study how the sling attaches and how it will move when in use. If the sling interferes with the safe operation or handling of the weapon, discontinue use. For further safety considerations, consult the owner's manual of your weapon and seek professional assistance.

Items needed:

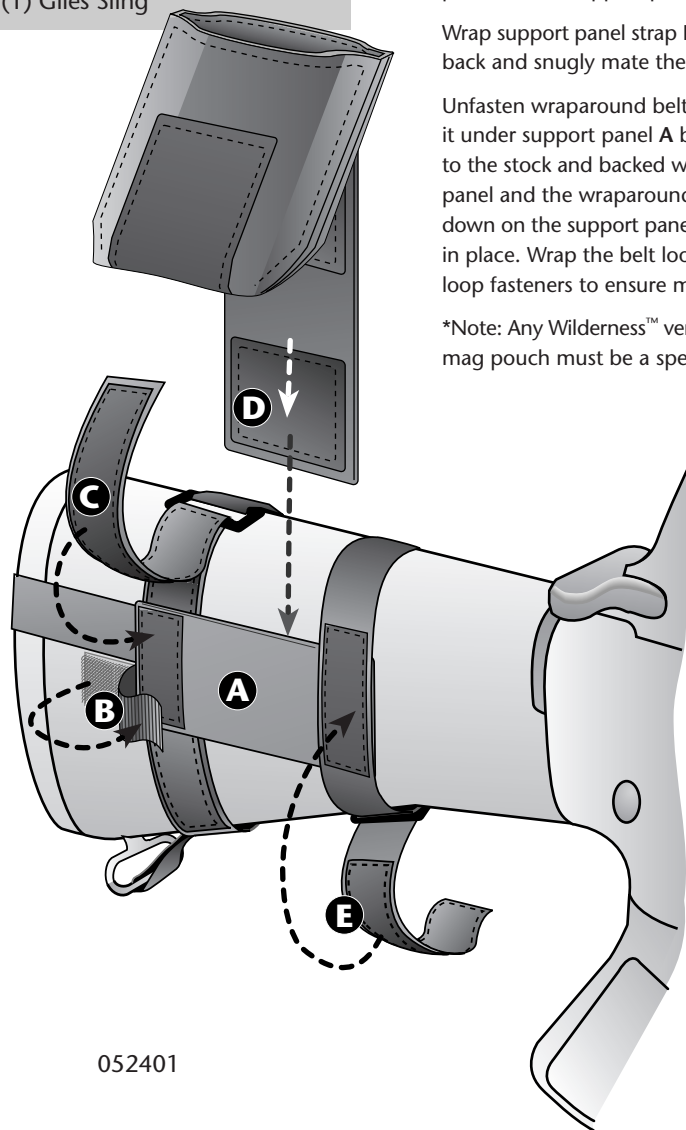

- (1) G.O. Pack™ adapter
- (1) AUG/AR mag pouch, vertical or special horizontal
- (1) Giles Sling™

Unfasten and loosen strap C of your Original Giles Tactical Sling™. Slide the length of the Velcro® security strip B under strap C. Fasten the hook Velcro® area on the back of support panel A onto the loop surface of sling strap C. Fold security strip B over onto the loop Velcro® on support panel A and secure. This prevents the unit from ripping loose or shifting under stress. Fold sling strap C down into secured position over support panel A and fasten snugly along its length to mate the Velcro®.

Wrap support panel strap E around the stock and run the end through the buckle at bottom. Fold strap back and snugly mate the Velcro® securely.

Unfasten wraparound belt loop D from AUG/AR pouch (vertical model shown) and straighten. Slide it under support panel A between straps C and E. This will be difficult as the panel is tightly secured to the stock and backed with hook Velcro®. We recommend placing a credit card between the support panel and the wraparound strap as you slide it through. When the wraparound strap is fully seated down on the support panel, slide out the credit card. The Velcro® backing will mate and lock the pouch in place. Wrap the belt loop around the front of the pouch and secure. Apply pressure to all hook and loop fasteners to ensure mating.

*Note: Any Wilderness™ vertical mag pouch will work on the G.O. Pack™ system. However, the horizontal mag pouch must be a special G.O. Pack™ unit with a 2" strap instead of the usual 3" strap.
