

TYPE 2 RIB-REINFORCED TELESCOPING (COLLAPSIBLE) BUTTSTOCK

© 2010 All rights reserved. Reproduction in whole or in part is prohibited.

Installation guide

*Instructions are for a right-handed shooter. Mirror steps to install the left-handed version.

- Start with the sling assembly on the left side of the stock. Pass tri-glide buckle **A** over the top of the stock to the right side. Feed webbing strap **B** through the bottom sling channel, from left to right (see figure 1).

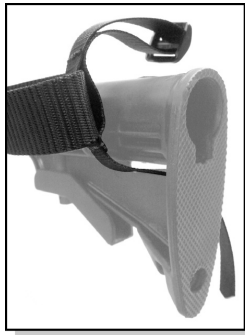

fig. 1

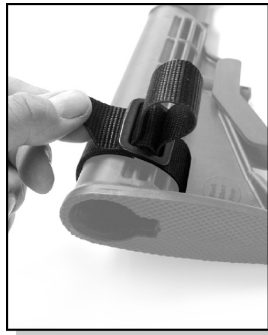

fig. 2

fig. 3

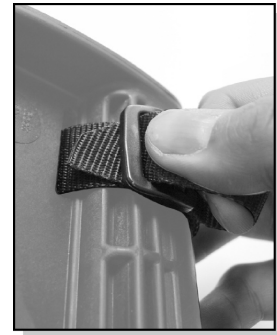

fig. 4

- Thread strap **B** up through the tri-glide (figure 2) and tighten (figure 3).
- Wrap the extra webbing back down over the tri-glide (figure 4) and feed the excess through the bottom slot of the buckle. This may require some effort as the buckle should be very snug. Feed the excess tab of webbing through the channel in the stock, from right to left, to secure it.
